OGP Roadmap

Patrick Florance, Tufts University

OGP Road Map Overview

- Provide summary of upcoming developments
- Discuss hosted services
- Discuss of where we are headed
 - Roadblocks and future developments
- Discuss next steps

OGP Road Map – Major Developments

- **OGP 2.0**, November 2013
- **OGP Harvester**, January 2013
- **OGP Metadata Toolkit**, Jan. 2013-March 2013
- **Formalize Flexible Governance Structure**,
December 2013
 - OGP Steering Group, Metadata Working Group and Developer Working Group
 - Do we become a formalize association
- **OGP Hosted Services**, begin January 2013

OGP Road Map – OGP Hosted Services

- Begin cost models January 2013
- Subscription service: hosting and consultation
- Entire architecture hosted in cloud
 - Interface
 - Data and metadata ingest
 - DBMS, Geoserver, etc.
- Subscriber creates metadata and loads data into OGP hosted service

OGP Road Map – OGP Hosted Services

- Begin cost models January 2013
- Subscription service: hosting and consultation
- Entire architecture hosted in cloud
 - Interface
 - Data and metadata ingest
 - DBMS, Geoserver, etc.
- Subscriber creates metadata and loads data into OGP hosted service

Summit Developments

- ?

What are the road blocks in the road map?

- ?

What are the road blocks in the road map?

- Metadata authoring
 - Knowledge, Standards, Tools, Staff
- Information Technology Infrastructure
 - Enterprise infrastructure required to host OGP
 - Difficulty level installing and configuring OGP
- ArcGIS Server
- Schema for metadata sharing
- Raster storage and caching
- De-duplication

Who are potential new partners?

- ?

Who are potential new partners?

- Grants and foundation support
- Colleges and universities
- Local, state, and federal governments
- International organizations
- INSPIRE
- GeoNetwork
- World Map (Harvard)
- Dataverse
- ESRI
- GeoNode
